

# HONEYWELL SAFETY PACK

## PERSONAL PROTECTION KIT

Now more than ever, PPE has become essential in everyday life to address the growing risk of exposure to splash, droplet and airborne pathogens we cannot see.

In this new environment, the dangers don't discriminate by job or workplace or destination. Solutions that were once designed for certain workers like healthcare professionals, first responders, construction and manufacturing employees are now essential for everyone. Having the right safety solutions allows us to adapt to our new normal, get back to work and start reshaping the future as we know it—together. Because now, we all share the responsibility to protect others by protecting ourselves.

## DESIGNED FOR SAFETY

The Honeywell Safety Pack provides easy access to PPE for employees, visitors and consumers. This kit comes in an easy-to-open pouch to increase confidence and personal safety. Each resealable bag has the option to be custom branded, and has the potential to contain a surgical mask, non-latex gloves, hand wipes, optional earplugs and more.
